

**CNC Machine maintenance mechanic / NOT VACANT****Tasks:**

Your job is to maintain and repair various types of CNC turning machines, thereby deciding on your own whether contacting the customer service of the machine producer is required or not. You are responsible for the trouble-free operation of the machines. Furthermore, you are actively involved in the production processes of our manufacturing activities. The tasks to be assumed by you cover a wide range of activities.

**Requirements:**

Completed vocational training as industrial mechanic or mechatronics specialist respectively. You are familiar with the relevant mechanical and electronic know-how required and have basic skills in CNC programming, enabling you to perform the tasks described above. You can work independently, are able to work in a team and communicative. Working flexible hours is not a problem for you.

Working hours: 08:00 to 17:15 h
